Cord and Pulley

- Calculate the square footage of each shade (width in inches x height in inches ÷ 144 = square footage)
- From the chart on the right determine the maximum allowable square footage per cord and pulley for the fabric you have selected. Each lifting system mechanism may lift more than one shade provided the maximum square footage is not exceeded. Square footage of a given fabric determines the weight which must be lifted.

| Maximum Allowable Shade Square Footage | | | |
|--|--------------------|------------------------|----------------------------|
| Fabric | Max sq. ft Unlined | Max sq. ft Reg. Lining | Max sq. ft Blackout Lining |
| Sunscreen | 110 | 95 | 78 |
